Career Objective

Motivated Computer Science undergraduate specializing in IoT and Automation. Interested in applying programming and web development skills to build real-world applications and embedded systems while continuously learning new technologies.

Education

B.Tech – Computer Science Engineering (IoT and Automation)

2024–2028

SASTRA University

Currently in 2nd Year (Undergraduate)

Technical Skills

- Programming: Python, C, C++, Java
- Web Technologies: HTML, CSS, JavaScript
- Technologies: Internet of Things (IoT), Embedded Systems

Projects

SASTRA Bill – Web Development Project

- Developed a billing management web application using HTML, CSS, and JavaScript.
- The system helps generate and manage bills efficiently with a simple user interface.
- Implemented structured bill calculation and dynamic invoice generation to improve accuracy and reduce manual billing errors.

Smart Dustbin – Embedded System Project

- Designed an automated smart dustbin using embedded system components and sensors.
- The lid automatically opens when a user approaches, improving hygiene and waste management.
- Integrated ultrasonic sensing with microcontroller logic to enable touch-free operation suitable for IoT-based waste management systems.

Strengths

- Logical Thinking
- Problem Solving
- Programming Fundamentals
- Embedded Systems Understanding
- Web Development Basics

Languages

- Telugu
- English
