Career Objective

Motivated Computer Science undergraduate specializing in IoT and Automation. Seeking opportunities to apply programming and web development skills in real-world projects while learning new technologies and contributing to innovative solutions.

Education

B.Tech – Computer Science Engineering (IoT and Automation)

SASTRA University

Currently in 2nd Year (Undergraduate)

Year:2024-2028

CGPA: 8.8

Technical Skills

- Programming: Python, C, C++, Java
- Web Technologies: HTML, CSS, JavaScript
- Frameworks/Libraries: React JS
- Technologies: Internet of Things (IoT), Automation Basics

Projects

AI Chatbot

- Developed an AI-based chatbot using Python to respond to user queries.
- Implemented basic Natural Language Processing techniques for better interaction.
- Integrated the chatbot with a simple web interface built using HTML, CSS, and JavaScript.

Alexa using Python

- Built a voice-controlled assistant using Python libraries such as speech recognition and text-to-speech.
- The assistant performs tasks like opening applications, web searching, and answering voice commands.

Full Stack Web Application

- Developed a full stack web application using HTML, CSS, JavaScript, and React JS.
- Designed responsive user interfaces and implemented dynamic frontend components using React.
- Focused on improving user experience through interactive UI design.

Certifications

- Certified in Web Development

Strengths

- Logical Thinking

Languages

- Telugu
- English
